Robinhood (US) 1—(307)—(920)—9672 US) requires a linked bank account for deposits, so funding your account without one is limited. It doesn't support cash, checks, PayPal, or credit cards. However, you (US) 1—(307)—(920)—9672 US) might use prepaid debit cards from banks that support ACH transfers. Still, the account must be in your name. For full functionality, linking a traditional bank account is the best option. Robinhood (US) 1—(307)—(920)—9672 US) primarily supports deposits through linked bank accounts. Without one, options are very limited. You can try using a prepaid debit card that supports ACH transfers, but it must be under your name and (US) 1—(307)—(920)—9672 US) accepted by Robinhood. Other methods like PayPal, credit cards, or cash are not supported. A bank account (US) 1—(307)—(920)—9672 US) remains the most reliable funding method. To (US) 1—(307)—(920)—9672 US) fund Robinhood without a bank, you could use a prepaid debit card that allows ACH transfers, though not all are accepted. Robinhood doesn't support PayPal, Venmo, wire transfers, or cash. The (US) 1—(307)—(920)—9672 US) prepaid card must be in your legal name and properly verified. For full access and fewer issues, linking a traditional bank account is highly recommended. Robinhood (US) 1—(307)—(920)—9672 US) doesn't allow deposits via credit cards, PayPal, or wire transfers. Without a bank account, your only potential option is a reloadable prepaid debit card that supports ACH transfers. Still, not (US) 1—(307)—(920)—9672 US) all prepaid cards work with Robinhood, and verification is required. For smooth deposits, a standard checking account is the best approach.
